**BuzzWest Announces Site Has Gone
DRM Free**

SAN DIEGO, CA. September 14, 2007—**BuzzWest** announces their site has gone DRM (Digital Rights Management) free.

"Although we will lose the added protection DRM we wanted to offer our loyal members a way to save the files and allow Mac users full access to our collection of naked military guys." says Buzz West.

In addition, BuzzWest.com will continue to offer three different sized download for their videos, and streaming options for over 130 Exclusive Videos. Members also enjoy access to 9 other content sites when they join BuzzWest.com. Now customers can download the videos and enjoy them forever without DRM.

Buzz West is excited to announce that he will be releasing a DVD Series of Videos in the next few months. We are also working with Red Apple Media to introduce some new technologies to our site, such as Microsoft's SilverLight. "One thing I learned while at DirkYatesLive was that your website has to grow and change with the market. We have always been responsive to our affiliates and customers and have always offered 24/7 support via live chat, phone, and email. Now, with the help of Red Apple Media we are planning a great 2008", says Buzz West.
